DETAILED ACTION

Drawings

The drawings have been received. Although suitable for publication, the inventor is informed that there are numerous paint "cracks" in all the photographs that lower the quality of the drawings.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Objection to the Disclosure

37 CFR 1.163

The following is a quotation of section (a) of 37 CFR 1.163:

(a) The specification must contain as full and complete a disclosure as possible of the plant and the characteristics thereof that distinguish the same over related known varieties, and its antecedents, and must particularly point out where and in what manner the variety of plant has been asexually reproduced. In the case of a newly found plant, the specification must particularly point out the location and character of the area where the plant was discovered.

35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1661

In plant applications filed under 35 U.S.C. 161, the requirements of 35 U.S.C. 112 are limited.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

As specific to United States Plant Patent applications, the specifics of 37 CFR 1.164 (reproduced below) are controlling:

The claim shall be in formal terms to the new and distinct variety of the specified plant as described and illustrated, and may also recite the principal distinguishing characteristics. More than one claim is not permitted.

The following is a quotation of 35 U.S.C. 162:

No plant patent shall be declared invalid for noncompliance with section 112 of this title if the description is as complete as is reasonably possible. The claim in the specification shall be in formal terms to the plant shown and described.

The disclosure is objected to under 35 CFR 1.163(a) and under 35 U.S.C. 112, first paragraph, because the specification presents less than a full, clear, and complete botanical description of the plant and the characteristics which define same *per se* and which distinguish the plant from related known cultivars and antecedents.

More Specifically:

A. Since the greater number of flowers per plant is an identifying characteristic, the number of flowers should be quantified.

B. Since there is less need for chemical growth retardation, it should be set forth in the specification whether growth retardants were used.

C. In accordance with 37 CFR 1.163, the instant plant must be compared with other similar varieties.

Art Unit: 1661

D. Ordinarily, the denomination proposed for registration in the United States must be the same as the denomination registered in another member state of UPOV. According to the Canadian UPOV hit, it appears the denomination has been changed to 'PKMP02'. This name also appears on a UPOV hit from Europe. Care must be taken to leave reference to the original name in the text because the photographs contain the original name.

E. The section of the specification titled "Brief Description of the Drawings" does not adequately characterize the drawings. Only two drawings are described yet there are four photographs that were received. Applicant needs to describe each of the drawings and in the case where there are more than two sheets, they should be labeled as "Fig. 1", etc and should be referred to as such in the specification.

The above listing may not be complete. Applicant should carefully review the disclosure and import into it any corrected or additional information, which would aid in botanically identifying and/or distinguishing the cultivar for which United States Plant Patent protection is sought.

Claim Rejections

35 U.S.C. 112, 1st & 2nd Paragraphs

Claim 1 is rejected under 35 U.S.C. 112, first and second paragraphs as not being supported by a clear and complete botanical description of the plant for the reasons set forth in the Objection to the Disclosure Section above.
